## MAINE AUTOMOBILE BOOK

The Maine Automobile Road Book for 1915 has been issued and is now being sent out to members of the Maine Automobile Association and to tourists all over the United States. The new book is undoubtedly one of the finest which has been issued by any State Association in the country. It contains 166 routes, covering every part of Maine and most of New Hampshire, much of eastern Massachusetts with the border routes in New Brunswick and the principal highway between the New England states and the city of Quebec.

In addition the book contains the latest automobile laws of Maine including those passed at the last session of the legislature which go into effect in July; the new fish and game laws of the state; the new forestry laws; rules for campers; a new complete summary of notable facts about Maine; a list of the standard through routes of travel in the territory covered by the road book including statements regarding some of the work which will be in progress during the summer as well as the best ways to go from place to place; the new regulations for automobiles entering Canada, including the special war tax now in effect; the announcement of the opening of Mt. Desert Island to automobiles, and a scientific statement on the reason why the Maine coast is cool, a complete description of the points of interest along the routes contained in the book, as well as many other features.

The book this year has three new road maps completely revised and redrawn, and printed in colors as a noteworthy feature of the volume. These include a general road map of all the automobile routes in the territory covered by the road book, a map showing the location of every sporting camp in Maine, together with the lakes, rivers and streams, and a Pine Tree Tour map. There are also other maps giving details about city and other cities and the best routes between points.

The book is so arranged this year that every route can be immediately found. The first part of the volume contains the Pine Tree Tour, the next the routes given in both directions. These are followed by the one-way routes and the reverse information of some of the Pine Tree Tour runs. Then comes the Canadian section with the automobile routes across the border, the series of indexes which this year are the finest to be found in any road book in the country, making its contents easily accessible. The book this year is bound in a waterproof, flexible binding. The paper is tinted so that it may easily be read in bright sunshine and is contained in a pocket inside the book cover, a new feature which will be much appreciated.

The book is being distributed through the Maine Automobile Association Touring Information Bureau, 12 Monument Square, Portland, Maine.

### Ask Any Sickie Smoker Why

he sticks to Sickie plug and slices off each pipeful as he needs it.

Real tobacco flavor depends upon the leaf being preserved in its natural state, possible only by pressing the leaves into plug form and keeping it in by covering with a natural leaf wrapper. The natural flavor and strength of tobacco escape when cut or granulated.

Take a Plug of Sickie that is even thoroughly dried out so that when you whittle it off it crumbles into dust, but it will burn and smoke smooth and cool as it has all of its original tobacco flavor preserved, unevaporated in Plug Form.

Whittling a pipeful is little trouble, amply repaid in both quality and quantity. Try this experiment and judge for yourself.

**THE YOUNG DAUGHTER**  
 Great Tact and Patience Are Required  
 to Make the Wheels Go Round.  
 "My dear, I am worried about my  
 young daughter," one harassed matron  
 confided to another lately. "She doesn't  
 seem to have an idea beyond young men  
 and clothes just now! I am quite at my  
 wits' end to know what to do! Indeed,  
 I've talked to her till I'm tired!" said the  
 other, in her calm, pleasant voice.  
 "I told her that I would not allow her  
 to wear such dreadfully loud clothes, and  
 that I was utterly ashamed of her! The  
 other morning I found her seated at the  
 window, smiling to all the high school  
 boys as they passed. And to them! Yes,  
 she was sitting there making eyes at each  
 and all of these indiscreetly, and lit-  
 erally beaming! No don't laugh, it  
 wasn't at all funny! I told her how per-  
 fectly disgusted I was, too!" the other  
 said.  
 "How old is your daughter?" the other  
 said.  
 "Just sixteen," was the answer,  
 "and quite old enough to know better—  
 as I told her. Your daughters seem such  
 attractive, ladylike girls. Do tell me  
 how you manage with them."  
 The second paused meditatively, then  
 said: "I am very, very careful of their  
 feelings, to begin with. No matter how  
 foolishly they may have acted, I always  
 remember that they are young, and that  
 only years can bring wisdom. If I were  
 you I should not have spoken outright to  
 your daughter on the subject of smiling  
 to these school boys, but influenced her  
 against it in another way."  
 "Please tell me," said the first ma-  
 tron.  
 "I shall not be at all offend-  
 ed, but only too glad to hear your views."  
 "Well," said the friend, "I should  
 have waited for a day or two and then  
 brought the conversation with your daugh-  
 ter round to that dreadful young person,  
 Sallie Smith. She is a sort of by-word  
 in the neighborhood, as you know, and  
 her behavior is condemned by every one.  
 I should let your views on Sallie Smith  
 and her goings-on be known to your  
 daughter and tell what a pity it is that  
 the boy-razes are so perfectly nice girls  
 that Sallie was so much spoiled. Tell her  
 of your own little daughter so much  
 better in the tactful and indirect way of  
 discussing the failings of Sallie with her;  
 and she in her own heart will be applying  
 it all to herself although she will think  
 that you do not see that. In that way  
 you will save her pride and influence her  
 quite as much; in fact, more so than by  
 speaking to her openly."  
 "And what would you do about these  
 dreadful clothes she loves to wear? She  
 dresses on an allowance and buys them  
 herself."  
 "Present her with something much  
 prettier, yet in better taste," said the  
 other quickly.  
 "If you want to educate  
 her taste you must give her something  
 more attractive to take the place of those  
 loud clothes she likes just now."  
 "I see," said the first matron thought-  
 fully. "Your plan sounds excellent. I  
 really think that I shall try it."

 Leaves as Fertilizer  
 Thousands of bushels of first-class fer-  
 tilizer are wasted every fall when the  
 burning of the leaves begins. These same  
 leaves spread over the gardens and spad-  
 ed under in the spring would prove of  
 great good, but the smoke given off  
 burning them produces nothing but chok-  
 ing coughs.  
 Again if these fertilizing substances or  
 mixed with other fertilizing substances or  
 earth and returned to the land, what?  
 Try it on a small lot of land.
